

## DESCRIPTION

HC-1 is available in two forms which are both designed to remove algae and stains from a boat's hull. HC-1 has been scientifically developed to penetrate and destroy bottom growth. Its unique gel based formula - only available in the liquid varieties - stays where it is applied and allows HC-1's molecules to react with the algae. Every HC-1 formula will readily remove growth from a boat's hull. Heavy and stubborn stains may require light scrubbing or power washing. HC-1 in 32oz bottles is equipped with SureSpray Technology. This bottle assembly is versatile and sprays the product in awkward positions including upside down.

---

## APPLICATION INSTRUCTIONS

### *32 oz. Spray Bottle*

Twist sprayer nozzle to desired spray pattern and apply HC-1 to contaminated surface. Take precautions not to spray product on yourself or others. If contact occurs, wash affected area thoroughly with water. Once algae has discolored, rinse the hull with water. For best results, apply HC-1 as soon as the boat is removed from the water.

### *1 Gallon Jug*

Pour into a yard sprayer, pressurize, and apply HC-1 to contaminated surface. Take precautions not to spray product on yourself or others. If you do come into contact with the product, wash affected area thoroughly with water. Once algae has discolored, rinse the hull with water. For best results, apply HC-1 as soon as the boat is removed from the water.

### *1 lb. Powder Package*

Measure 1/2 of the container and dissolve powder in warm water. Mix thoroughly and make sure powder is dissolved. Mixing can take place directly within a yard sprayer or in a bucket. Apply HC-1 to contaminated surface. Please take precautions not to spray product on yourself or others. If you do come into contact with the product, wash affected area thoroughly with water. Once the algae has discolored, rinse the hull with water. For best results, apply HC-1™ as soon as the boat is removed from the water.

## PACKAGING

- 1 Spray Bottle
- 1 Gallon Jug

## ECO-FRIENDLY

HC-1 is environmentally friendly and contains zero phosphates.

## STORAGE

Keep container closed and stored in a dry place.

## ACTIVE INGREDIENTS

Ethanedioic acid, surfactants, biodegradable cleaning agents.

---

## SAFETY INSTRUCTIONS

When using HC-1 take measures to avoid direct contact with the material. Do not get in eyes. Safety glasses and gloves are recommended when using HC-1. HC-1 is an acid-based cleaner and may irritate your skin and eyes. Harmful if swallowed. Seek medical attention or poison control center immediately if you ingest. Keep out of the reach of children.
